# EXPRESS SERVICES

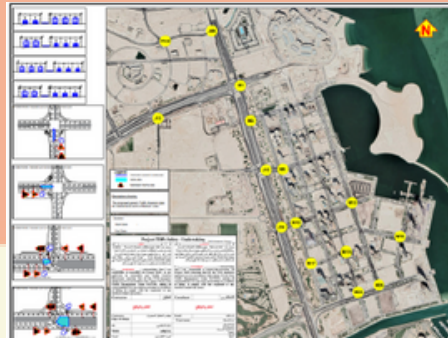

## Traffic Management Operations

Implementation of traffic management is necessary to control, redirect or slow down traffic movement to avoid accidents, An approved TDP is a requirement for the issue of a Road Opening Permit (ROP) and is required to be present at the work zone at all times. Express Traffic Management Company offers the most reliable traffic management services in full compliance to Middle East traffic management guide and standards ie. Qatar's WZTMC:

## Traffic Diversion Plans (TDP's):

Set of designed plans that process to be followed to plan, gain approval, implementation, maintain and decommission Temporary Traffic Management associated with a work zone in a safe effective manner. Consist of RO Approval.Moi approval.

## Work Zone Implementation, Maintenance and Clearance

Work in a safe manner to minimize risk while installing TTM, Long-term TTM will require short-term TTM to facilitate implementation/decommissioning Plan the order of site establishment to ensure a safe method of work and continued use by road users TTM must be installed and decommissioned in accordance with the Implementation and Clearance Plans within the approved TDP TDPs should be based around work staging, allowing the TTM within the work zone to evolve as the works do.

## Road Safety Training under ASEVI

### Road Safety Course Title

- Road Safety for Introduction to Temporary Traffic Management • (certified by ASEVI) (RS ITTM) classroom
- Road Safety for Site Traffic Management Supervisor Training (RS STMS) • (certified by ASEVI) classroom
- Must have completed and passed either ITTM or STMP courses
- Road Safety for Site Traffic Management Personnel Training (RS STMP) • (Certified by ASEVI) classroom
- Road Safety for Truck Mounted Attenuator Training (TMA) • (Certified by ASEVI) classroom
- Road Safety in Work Zones • (Certified by ASEVI) 20 hours classroom face to face

## Traffic Impact Studies

Express assesses the potential impact of traffic as a result of a proposed development or redevelopment and identifies the roadway of improvements required to ensure that the road network will operate safely and efficiently upon completion of the project.

## Road Safety Audits

To Deliver a Road Safety Audit with a formal examination of the operational safety of an existing or future road link or intersection by our independent and suitably qualified Road Safety Audit team. It reports qualitatively on potential road safety issues and identifies opportunities to improve operational safety for all road users with the objective of minimizing the number and severity of personal injury crashes in accordance with the Safe System approach.
